Chris Chatterton
Director
Brown Box

"I've been working with technology and the web for over 20 years. I've run my own businesses and run businesses for others. I get what you need.

I've seen all the pitfalls and traps that businesses so easily fall into and I constantly see other businesses offer solutions that look good at face value but soon burden businesses with constraints and unnecessary costs.

I created this pack to provide a cost effective solution that sets you up with the technical foundations to succeed on the web; the essential features all small businesses need; and the knowledge and training to make it work."

Create a website today that will grow and respond to your changing business needs.
